

Personal Profile

As a Retail Assistant, I thrived in a busy environment, effectively managing stress and pressure. I engaged with customers, addressing their queries, handling cash transactions, and ensuring proper float management. I excelled in teamwork, providing support to colleagues.

Currently, I am a trainee at JUSTIT Software Development Bootcamp, where I am enhancing my software development skills. Under the guidance of mentors, I am learning new programming languages and technologies to develop my portfolio website and other side projects. I actively share knowledge and code with peers, fostering a collaborative learning environment.

I aspire to become a Junior Software Developer, focused on creating efficient software solutions. I aim to grow professionally by mastering new languages, tools, and frameworks. I look forward to contributing to team success while sharing the skills I have acquired throughout my training.
